

Privacy Screens

Fixed Aluminium Screens & Gates

Aluminium Privacy Screens are a modern, seamless design that will add value to your home.

Suited for use as gate features, presentation walls, fencing and privacy screening, they are often used as features or highlights in modern architecture.

Aluminium Privacy Screens are available in either flat or louvred styles with 65mm elliptical slats. Flat style Privacy Screens come with a choice of 10mm or 20mm spacing depending on the level of privacy required.

A unique alternative to timber, aluminium is weather resistant and will not splinter, flake, peel, corrode, discolour or warp.

Technical

- Made of durable, weather-proof aluminium: requires no on-going maintenance saving you time and money
- Firm locking system: No unsightly welding joins or open channels which can collect dirt and leaf debris
- Choice of slat spacing: 10mm or 20mm (flat)
- Choice of frame: Full Frame or Partial Frame
- Choice of vertical or horizontal slats
- Design options: Frame and slats colours can be mixed and matched
