

Roller-Motorised

Motorised 240v Roller Blind

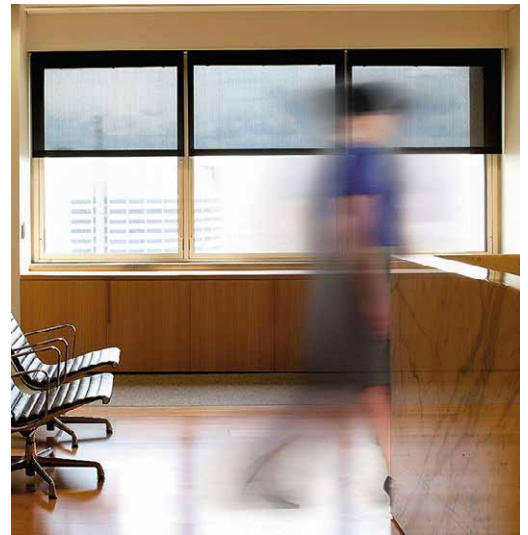

The Ambience Roller-Motorised 240v range from Acmeda gives you many options on how you would like to operate your blinds. The size of your blinds will direct us to the most appropriate of the systems. With the streamlined Automate S45 and S60 version for those larger, linked or double blinds and stylish pelmets to cover the blinds working hardware.

The Automate S45 range offers three Slimline high-performance motorised solutions for a medium sized roller blind. Whether you use the astonishing Automate Q showcasing the latest in quiet operating technology, the EL with seamless electronic limit setting capability, or the ML for home automated control systems, there is a reliable and simple to use solution for any

roller blind application. All motors feature in-built receivers with a frequency range up to 200m, controlled by our contemporary and stylish remotes and feature slim white head-units for increased aesthetical appearance and minimal light gaps.

Automate S60 offers a complete motorised solution for large internal roller blinds. With a capacity to hold up to 40Kg, the Automate EL S60 has 5 step programming. The S60 motor can be controlled by the Automate RF400 & RF500 series remote controls.

There are options to suit your need based both on space and aesthetics.

Technical
